

# Underground LPG tanks

## Safety:

Underground LPG tanks that we produce satisfy the safety requirements of propane and butane storage.

We hold current permits to manufacture such tanks issued by a Notified Body.

The tanks we produce hold a CE standard, which means they are accepted in the European Union. LPG tanks are made of carbon steel and equipped with an access manhole with a cover with fittings.

Sump

Anchoringbands

## Technical data:

- Production in line with the norm EN 13445: 2002 and Directive PED/97/23/EC
- Anticorrosive protection – polyurethane layer of Endoprene resistant to puncture 14 kV
- Pressure: 15,6 barów
- Working temperature: -20/+40°C

Nominal volume	Dimensions			Weight
	diameter	length	band spacing	
[m <sup>3</sup> ]	[mm]	[mm]	[mm]	[kg]
9,23	1250	8191	7800	2084
10	1600	5880	5600	2967
15	1600	7880	7600	3771
